

PRESENTS ON WORLD ALZHEIMER MONTH

Our Brains, Our Memories

This is the century of the brain.

Doctors, molecular biologists, computer engineers, mathematicians & scientists from all over the world are working together to study how the brain works and how we may prevent & cure diseases like Alzheimer. This massive research effort has already provided exciting results on why Alzheimer develops and how to diagnose it.

The Alzheimer and Memory Clinic at the Kokilaben Hospital has joined hands with centers from around the world to commemorate the World Alzheimer Month, 2015. We invite you to learn about early signs of Alzheimer, how we can prevent it and how we may treat it. Together we can remember those who are living with dementia & help remove the stigmatisation & misinformation that surrounds dementia.

Venue: 6th Floor, Convention Center Date: Sunday, 13th September, 2015 Time: 10 am onwards, followed by lunch
